PROFESSIONAL SUMMARY

Computer Systems Engineer and Business Informatics Technician with hands-on experience in end-user support, incident troubleshooting, equipment installation and configuration, technical documentation, and customer service. Currently working as a QA Automation Intern at L.L.Bean, investigating failures, recording findings in Jira, and collaborating with technical teams. Additional experience includes first-level support in a hospital environment and more than four years in customer service and operations. Known for organization, communication, service quality, continuous learning, and timely problem resolution.

CORE COMPETENCIES

End-user technical support | Incident management and documentation | Windows | Microsoft 365 | Hardware and software installation | TCP/IP and DNS fundamentals | Active Directory (basic) | Service request handling | Escalation | Customer service | Continuous improvement

PROFESSIONAL EXPERIENCE

L.L.Bean | QA Automation Intern | 2026 - Present

- Investigate, reproduce, and document incidents affecting enterprise applications; record evidence and findings in Jira and communicate results to support resolution.
- Perform manual and automated validations, compare expected and actual results, and collaborate with QA Engineers and other technical teams to analyze failures and risks.
- Use Jira, Git, GitHub, VS Code, and Cypress within documented processes, maintaining traceability and contributing improvements to documentation and workflow.

Hospital San Francisco de Asís | IT Support Intern | Aug 2019 - Dec 2019

- Provided first-level technical support to internal users for computers, printers, Windows operating systems, and basic applications.
- Diagnosed hardware and software issues, performed preventive and corrective maintenance, and installed and configured equipment, operating systems, and applications.

Viajes Excalibur | Sales Agent - Customer Service and Operations | Jan 2021 - Aug 2025

- Handled customer inquiries, changes, and service requests across multiple channels, maintaining clear communication, accurate documentation, and follow-up through closure.
- Prioritized multiple cases, coordinated with external providers, and resolved time-sensitive operational incidents, strengthening service orientation and user support skills.

Clínica Eliecer Vásquez | University Internship - Application Development and Support | Mar 2025 - Aug 2025

- Gathered user requirements and developed a scheduling application with an SQL database used to manage approximately 20-30 daily appointments.
- Provided post-implementation support, investigated incidents, and implemented improvements based on users' operational needs.

TECHNICAL SKILLS

Support and systems: Windows, desktop support, PC and printer troubleshooting, operating system, application, hardware, and software installation and configuration, preventive and corrective maintenance.

Networking and identity: TCP/IP, DNS, and connectivity fundamentals; basic knowledge of Active Directory and Microsoft Entra ID.

Microsoft and endpoints: Microsoft 365 (Outlook, Teams, OneDrive, and SharePoint); Microsoft Azure fundamentals; endpoint administration concepts and conceptual familiarity with Microsoft Intune.

Incidents and tools: Jira, ticket management, documentation, prioritization, investigation, escalation, continuous improvement, Git, GitHub, VS Code, SQL, and Power BI.

Cybersecurity: Foundational information security concepts and good practices for incident management and information protection.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Computer Systems Engineering - Universidad Latina de Costa Rica, 2025 | Technical Diploma in Business Informatics - C.T.P. Santa Eulalia, 2019

ISTQB Certified Tester - Foundation Level (CTFL) v4.0, 2025 | Microsoft Azure Administrator (AZ-104) preparation in progress | Intermediate Power BI Certificate, 2023

LANGUAGES

Spanish - Native | English - Upper-Intermediate (B2+)
